

## A/V ENVIRONMENT

### Keep It Cool ... and Quiet

With today's A/V and networking systems becoming more complex, the need for a performance-friendly environment is more important than ever. BoraGear's new Kona II has the ability to cool two-unit rack spaces with 80 cubic-feet of air per minute. The company says the cooling device produces just 15 dB of noise and it includes BoraGear designs such as vibration-isolated fans and offset grilles. **BoraGear, [www.boragear.com](http://www.boragear.com)**

### It's Like Installation Insurance

Middle Atlantic's IsoCenter Rackmount Isolation Transformer & Load Center is engineered to solve many electrical problems that installers run into while installing a system. The IsoCenter cures ground loop, common-mode and differential mode problems, while protecting against voltage spikes. In addition, its shut-off function will power a system down if an under- or over-voltage is detected. It has a total capacity of 5kVA. **Middle Atlantic Products, Inc., [www.middleatlantic.com](http://www.middleatlantic.com)**

## AUDIO

### By Installers, For Installers

Current Audio was founded by a custom installer to address needs within the custom install market that other manufacturers hadn't. One of the company's latest loudspeaker solutions is the FIT651 in-ceiling loudspeaker. An efficient architectural product, the FIT651 incorporates a switchable EQ feature, along with a 6.5-inch woofer and 1-inch, pivoting tweeter. It offers a frequency response of 40 Hz to 20 kHz and it's 90-dB sensitive. **Current Audio, [www.currentaudio.com](http://www.currentaudio.com)**

### Install Sound Anywhere

VibraDrive's VAAS 30 device is designed to turn nearly any surface into a loudspeaker

### Architectural Speakers with a Plan

Totem Acoustic's Tribe line of in-wall and in-ceiling products features one-piece back boxes, anodized aluminum front frames, 6-ohm nominal impedance ratings, bi-wire binding posts, even-tension, high-torque mounting clamps, wire-management channels and the ability to play up to 110 dB.

**Totem Acoustic, [www.totemacoustic.com](http://www.totemacoustic.com)**

and it produces about 30 watts with a frequency response of approximately 200 Hz to 12 kHz. Installers can use the VAAS 30 for just about anything, including bedroom and bathroom systems, as well as commercial installations such as boardrooms and office environments.

### Install Now ... While Supplies Last

Combining elements from its Paradigm and Paradigm Reference line of products, Paradigm launched a limited time Special Edition line. It's made up of the SE 1 bookshelf model, the SE 3 floor-standing speaker, the SE Center speaker and the SE Subwoofer. The SE line is designed with clean lines and soft edges. Paradigm says it has priced the speakers aggressively.

## VIDEO

### TV Lift Takes Precautions

Consumers are buying more and bigger TVs these days. Wood Technology's Whisper Ride 1000 is designed to accommodate large flat-panel TVs and the lift requires a built-in height of just 29.5 inches. Wood offers the lift with IR

and RF control options and it incorporates anti-squeeze safety protection to guard against items being caught in the lift's mechanism.

### Video Monitoring to the MAX

IC Realtime's new MAX4 DVR uses H.264 compression to enable quality video streams in environments that have lots of bandwidth and even low bandwidth capabilities. It uses a Linux-based operating system for reliable performance. The DVR supports high-resolution video through its HDMI output options. Other features include two-way audio, IR control, direct network access and the ability to store up to 1 TB of content.

## HOME ENHANCEMENTS

### Can You Hear Me Now?

Home Automation Inc.'s Cellular Communications Center (C3) is a wireless communications device that enables GSM cell phone calls to use a home's existing telephones, and it can be used when landlines aren't in place. The C3 also connects to any standard security
